Anchorage Office of Emergency Management

Community: Blood Bank of Alaska needs plasma donations from recovered COVID-19 patients

Dear Don Bush,

Blood Bank of Alaska is in critical need of plasma from recovered COVID-19 patients. BBA has worked with more than 30 recovered COVID-19 patients to ensure that convalescent plasma is available for local area hospitals. We are currently critical for additional donors.

The increase of positive cases around the state has increased demand for this plasma to assist recovering patients. One patient now released from the hospital in Fairbanks, credits this treatment for saving his life.

If you or someone you know has recovered from COVID-19, please ask them to contact Blood Bank of Alaska to donate plasma to help other Alaskans at 907-222-5630.

For more information, you can visit the BBA website at <https://www.bloodbankofalaska.org/covid-19-donor/>
